### 1 Opis projektu

### 1.1 Opis

Aplikacja dla studentów umożliwiająca szybki i łatwy podgląd dostępnych materiałów! Każdy student może wybrać kierunki studiów, którymi jest zainteresowany i oglądać przypisane do nich notatki! W każdej chwili może dodać nowe lub usunąć nieinteresujące go kierunki ze swojej listy. Aplikacja jest prosta w użytkowaniu, jednak wymaga połączenia z internetem.

### 1.2 Funkcjonalności

#### 1.2.1 Logowanie i Rejestracja

Załóż swoje konto, a będziesz mógł korzystać z aplikacji z każdego urządzenia, na którym jest zainstalowana i posiada dostęp do internetu! Zachowaj Twoje listy kierunków na swoim koncie!

#### 1.2.2 Przypasanie do grup

Wybierz kierunki, które Cię interesują i przeglądaj materiały z nimi powiązane. W każdej chwili możesz dopisać do swojej listy nowe kierunki lub usunąć już niepotrzebne.

### 1.2.3 Notatki

Przeglądaj dostępne materiały z listy kierunków, którą sam utworzyłeś. Jeśli chcesz mieć dostęp offline to pobierz materiał w formie pliku!

### 2 Technologie

### 2.1 Oprogramowanie

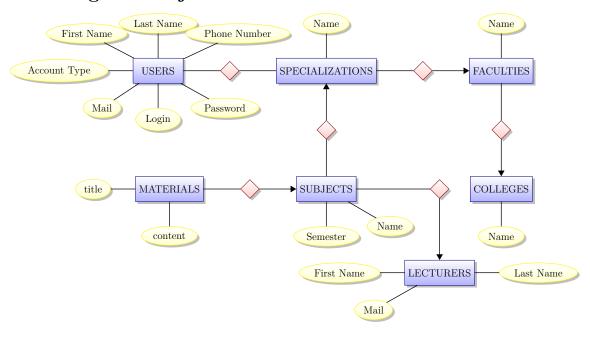

- Visual Studio 2015 Środowisko programistyczne.
- SourceTree Kontrola wersji.
- GitHub Repozytorium do przechowywania wersji online.
- Heroku Chmura, w której przechowywana jest baza danych.

### 2.2 Technologie

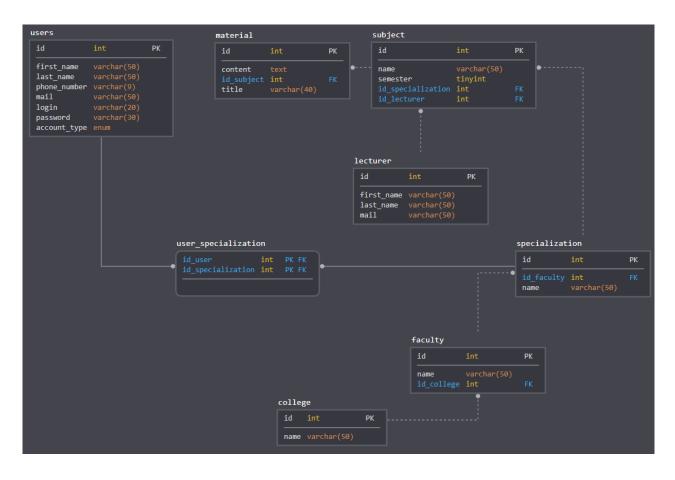

- C#
- .NET
- MySQL

## 3 Baza Danych

### 3.1 Diagram Encji

### 3.2 Diagram Relacji

### 3.3 MySQL

#### 3.3.1 Zapytania dotyczące 'Colleges'

#### 3.3.2 Zapytania dotyczące 'Faculties'

```
SP_GET_ALL = "SELECT 'Id', 'Name', 'College_Id' FROM faculties";
SP_GET_FILTER = "SELECT 'Id', 'Name', 'College_Id' FROM faculties
  {0}";
SP_GET_BYPAGE = "SELECT * FROM faculties {1} ORDER BY {0} LIMIT
  {2}, {3}; SELECT COUNT(*) FROM faculties {1};";
SP_GET_BYID = "SELECT 'Id', 'Name', 'College_Id' FROM faculties
  WHERE Id = @ref_id";
SP_ADD = "INSERT INTO faculties ( Id, Name, College_Id) VALUES (
  @Id, @Name, @College_Id) ";
SP_ADD1 = "INSERT INTO faculties ( Id, Name, College_Id) VALUES (
  @Id, @Name, @College_Id) SELECT @Id = @@IDENTITY";
SP_UPDATE = "UPDATE faculties SET Name = @Name, College_Id =
   @College_Id WHERE Id = @Id";
SP_DELETE = "DELETE FROM faculties WHERE Id=@ref_id";
SP_DELETE_FILTER = "DELETE FROM faculties {0}";
SP_GET_LOOKUP = "SELECT Id, Name FROM faculties";
```

#### 3.3.3 Zapytania dotyczące 'Lecturers'

```
SP_GET_ALL = "SELECT 'Id', 'Name', 'Surname', 'EmailAddress' FROM
  lecturers";
SP_GET_FILTER = "SELECT 'Id', 'Name', 'Surname', 'EmailAddress'
  FROM lecturers {0}";
SP_GET_BYPAGE = "SELECT * FROM lecturers {1} ORDER BY {0} LIMIT
   {2}, {3}; SELECT COUNT(*) FROM lecturers {1};";
SP_GET_BYID = "SELECT 'Id', 'Name', 'Surname', 'EmailAddress' FROM
  lecturers WHERE Id = @ref_id";
SP_ADD = "INSERT INTO lecturers ( Id, Name, Surname, EmailAddress)
  VALUES ( @Id, @Name, @Surname, @EmailAddress) ";
SP_ADD1 = "INSERT INTO lecturers ( Id, Name, Surname, EmailAddress)
   VALUES ( @Id, @Name, @Surname, @EmailAddress) SELECT @Id =
   @@IDENTITY";
SP_UPDATE = "UPDATE lecturers SET Name = @Name, Surname = @Surname,
   EmailAddress = @EmailAddress WHERE Id = @Id";
SP_DELETE = "DELETE FROM lecturers WHERE Id=@ref_id";
SP_DELETE_FILTER = "DELETE FROM lecturers {0}";
SP_GET_LOOKUP = "SELECT Id, Name FROM lecturers";
```

#### 3.3.4 Zapytania dotyczące 'Materials'

```
SP_GET_ALL = "SELECT 'Id', 'Title', 'Content', 'Subject_Id' FROM
  materials";
SP_GET_FILTER = "SELECT 'Id', 'Title', 'Content', 'Subject_Id'
  FROM materials {0}";
SP_GET_BYPAGE = "SELECT * FROM materials {1} ORDER BY {0} LIMIT
   {2}, {3}; SELECT COUNT(*) FROM materials {1};";
SP_GET_BYID = "SELECT 'Id', 'Title', 'Content', 'Subject_Id' FROM
  materials WHERE Id = @ref_id";
SP_ADD = "INSERT INTO materials ( Id, Title, Content, Subject_Id)
  VALUES ( @Id, @Content, @Subject_Id) ";
SP_ADD1 = "INSERT INTO materials ( Id, Title, Content, Subject_Id)
  VALUES ( @Id, @Content, @Subject_Id) SELECT @Id = @@IDENTITY";
SP_UPDATE = "UPDATE materials SET Title = @Title, Content =
   @Content, Subject_Id = @Subject_Id WHERE Id = @Id";
SP_DELETE = "DELETE FROM materials WHERE Id=@ref_id";
SP_DELETE_FILTER = "DELETE FROM materials {0}";
SP_GET_LOOKUP = "SELECT Id, Title, Content FROM materials";
```

### 3.3.5 Zapytania dotyczące 'Specializations'

```
'Id', 'Name', 'Faculty_Id' FROM
SP GET ALL = "SELECT
   specializations";
SP_GET_FILTER = "SELECT 'Id', 'Name', 'Faculty_Id' FROM
   specializations {0}";
SP_GET_BYPAGE = "SELECT * FROM specializations {1} ORDER BY {0}
  LIMIT {2}, {3}; SELECT COUNT(*) FROM specializations {1};";
SP_GET_BYID = "SELECT 'Id', 'Name', 'Faculty_Id' FROM
  specializations WHERE Id = @ref_id";
SP_ADD = "INSERT INTO specializations ( Id, Name, Faculty_Id)
  VALUES ( @Id, @Name, @Faculty Id) ";
SP_ADD1 = "INSERT INTO specializations ( Id, Name, Faculty_Id)
  VALUES ( @Id, @Name, @Faculty_Id) SELECT @Id = @@IDENTITY";
SP_UPDATE = "UPDATE specializations SET Name = @Name, Faculty_Id =
   @Faculty_Id WHERE Id = @Id";
SP_DELETE = "DELETE FROM specializations WHERE Id=@ref_id";
SP_DELETE_FILTER = "DELETE FROM specializations {0}";
SP_GET_LOOKUP = "SELECT Id, Name FROM specializations";
```

### 3.3.6 Zapytania dotyczące 'Subjects'

```
SP_GET_ALL = "SELECT 'Id', 'Name', 'Semester', 'Lecturer_Id',
   'Specialization_Id' FROM subjects";
SP_GET_FILTER = "SELECT 'Id', 'Name', 'Semester', 'Lecturer_Id',
   'Specialization_Id' FROM subjects {0}";
SP_GET_BYPAGE = "SELECT * FROM subjects {1} ORDER BY {0} LIMIT {2},
  {3}; SELECT COUNT(*) FROM subjects {1};";
SP_GET_BYID = "SELECT 'Id', 'Name', 'Semester', 'Lecturer_Id',
   'Specialization_Id' FROM subjects WHERE Id = @ref_id";
SP_ADD = "INSERT INTO subjects ( Id, Name, Semester, Lecturer_Id,
   Specialization_Id) VALUES ( @Id, @Name, @Semester, @Lecturer_Id,
   @Specialization_Id) ";
SP_ADD1 = "INSERT INTO subjects ( Id, Name, Semester, Lecturer_Id,
   Specialization_Id) VALUES ( @Id, @Name, @Semester, @Lecturer_Id,
   @Specialization Id) SELECT @Id = @@IDENTITY";
SP_UPDATE = "UPDATE subjects SET Name = @Name, Semester =
   @Semester, Lecturer_Id = @Lecturer_Id, Specialization_Id =
   @Specialization_Id WHERE Id = @Id";
SP_DELETE = "DELETE FROM subjects WHERE Id=@ref_id";
SP_DELETE_FILTER = "DELETE FROM subjects {0}";
SP_GET_LOOKUP = "SELECT Id, Name FROM subjects";
```

### 3.3.7 Zapytania dotyczące 'Users'

```
SP_GET_ALL = "SELECT 'Id', 'FirstName', 'LastName', 'PhoneNumber',
   'MailAddress', 'Login', 'Password', 'AccountType' FROM users";
SP_GET_FILTER = "SELECT 'Id', 'FirstName', 'LastName',
  'PhoneNumber', 'MailAddress', 'Login', 'Password', 'AccountType'
  FROM users {0}";
SP_GET_BYPAGE = "SELECT * FROM users {1} ORDER BY {0} LIMIT {2},
  {3}; SELECT COUNT(*) FROM users {1};";
SP_GET_BYID = "SELECT 'Id', 'FirstName', 'LastName',
  'PhoneNumber', 'MailAddress', 'Login', 'Password', 'AccountType'
  FROM users WHERE Id = @ref_id";
SP_ADD = "INSERT INTO users ( Id, FirstName, LastName, PhoneNumber,
  MailAddress, Login, Password, AccountType) VALUES ( @Id,
  @FirstName, @LastName, @PhoneNumber, @MailAddress, @Login,
  @Password, @AccountType) ";
SP_ADD1 = "INSERT INTO users ( Id, FirstName, LastName,
  PhoneNumber, MailAddress, Login, Password, AccountType) VALUES (
  @Id, @FirstName, @LastName, @PhoneNumber, @MailAddress, @Login,
  @Password, @AccountType) SELECT @Id = @@IDENTITY";
SP_UPDATE = "UPDATE users SET FirstName = @FirstName, LastName =
  @LastName, PhoneNumber = @PhoneNumber, MailAddress =
  @MailAddress, Login = @Login, Password = @Password, AccountType =
  @AccountType WHERE Id = @Id";
SP_DELETE = "DELETE FROM users WHERE Id=@ref_id";
SP_DELETE_FILTER = "DELETE FROM users {0}";
SP_GET_LOOKUP = "SELECT Id, FirstName FROM users";
```

#### 3.3.8 Zapytania dotyczące 'UserSpecializations'

```
SP_GET_ALL = "SELECT 'User_Id', 'Specialization_Id' FROM
  userspecializations";
SP_GET_FILTER = "SELECT 'User_Id', 'Specialization_Id' FROM
  userspecializations {0}";
SP_GET_BYPAGE = "SELECT * FROM userspecializations {1} ORDER BY {0}
  LIMIT {2}, {3}; SELECT COUNT(*) FROM userspecializations {1};";
SP_GET_BYID = "SELECT 'User_Id', 'Specialization_Id' FROM
   userspecializations WHERE User_Id = @ref_id";
SP_ADD = "INSERT INTO userspecializations ( User_Id,
   Specialization_Id) VALUES ( @User_Id, @Specialization_Id) ";
SP_ADD1 = "INSERT INTO userspecializations ( User_Id,
   Specialization_Id) VALUES ( @User_Id, @Specialization_Id) SELECT
   @User_Id = @@IDENTITY";
SP_UPDATE = "UPDATE userspecializations SET Specialization_Id =
   @Specialization_Id WHERE User_Id = @User_Id";
SP_DELETE = "DELETE FROM userspecializations WHERE User_Id=@ref_id";
SP_DELETE_FILTER = "DELETE FROM userspecializations {0}";
SP_GET_LOOKUP = "SELECT User_Id, User_Id FROM userspecializations";
```

### 3.4 Środowisko

Baza danych znajduje się w chmurze Heroku. Do połączenia z nią korzystamy z technologii .NET i jej części LINQ(Language INtegrated Query).
